Little Henderson

Quality Inspection Technician III · AI Interpretability Developer

wakillorenzo@gmail.com · LinkedIn · GitHub · noeticcompass.com

Profile

Aerospace quality inspection technician and AI interpretability developer. Experience in Signal Pathway Verification, high-reliability PCBA inspection, fault isolation, root cause analysis, and AS9100 traceability. Developing Noetic Compass and CAS research tools while pursuing a B.S. in Computer Science.

Experience

Amazon Leo — Quality Inspection Technician III / Level 3

January 2025 – September 2026

Initially engaged through Trigo Global Quality Solutions.

- Operated Signal Pathway Verification stations and investigated electrical integrity and signal-routing failures on satellite PCB assemblies.
- Inspected assemblies against IPC-A-610 Class 3 and space hardware workmanship criteria.
- Maintained non-conformance documentation, traceability records, calibration checks, and AS9100 audit readiness.
- Worked with engineering teams on defect reproduction, corrective actions, and inspector training.

Noetic Compass — Developer & Principal Researcher

Independent work, concurrent with professional experience

- Developing CAS Harness, a Python toolkit for cross-model interpretability experiments and controlled evaluation.
- Developing CAS Native, an inspectable-by-design model architecture; key design risks and validation questions remain open.
- Built applied JavaScript / React interfaces and scenario assessment tools.
- Research includes matched controls and documented negative findings. No proven general intelligence claim is made.

Jabil Defense & Aerospace — Quality Inspector

January 2022 – October 2024

PCBA inspection, space hardware workmanship criteria, inspection documentation, process feedback, and training for new inspectors.

Cirkular — Quality Control Lead Inspector

July 2019 – November 2021

Line quality monitoring, conformance inspection, quality reporting, and process improvement.

Intuit QuickBooks — Product Expert

February 2017 – June 2021

Customer support, tax form review, data accuracy checks, and product quality review.

Skills

Quality: PCBA inspection, Signal Pathway Verification, IPC-A-610 Class 3, AS9100, fault isolation, root cause analysis, NCR / MRB documentation, first article inspection, ESD / FOD, traceability.

Software: Python, C++, Rust, TypeScript / JavaScript, React, SQL, PyTorch / Hugging Face, experimental design, technical documentation.

Education

B.S. Computer Science — AI emphasis
Full Sail University — in progress.

Python for Data Analysis — UC Santa Cruz Silicon Valley Extension, 2022
Business Administration coursework — Valencia College
IBM Data Science Series — Coursera, 2022

Certifications & writing

IPC specialist certifications listed in the owner-provided résumé: IPC-A-610, IPC J-STD-001, Space Applications Addendum, and IPC/WHMA-A-620, issued September / October 2023. Current validity has not been independently checked.

CAS Harness Specification Sheet and CAS Provenance Preprint; author of *Majik and the True Kabbalah, the Book of Tootra*.

Prepared from the owner-provided October 2026 résumé. This public version excludes street address, phone number, and certification identifiers.
